TEMPERANCE GATHERING .- This evening Horaco Greeley, Mr. Revell and Capts. De Camp and Hartt of the New-York Police Department will address the residents of Yorkville on the subject of temperance.

J. PHILLIPS PHENIX died auddenly yesterday. He was born in New-Jersey, but lived all his mature life in the 1st Ward of our city, of which he was many years Alderman when that office reflected no disgrace on him who filled it. He was chosen to Congress (House) at the election of 1842, and again at that of 1848, serving out each term with industry and probity. He was a Member of Assembly, chosen in 1817. He He was a son-in-law of the wealthy Stephen Whitney. and in politics a Whig. His vocation was that of merchant, but he retired on a competence many years since. He was not a great but he was a good man. and had no enemies.

BULL'S HEAD.-There were 600 head less cattle yarded in Forty-fourth street for the great weekly cattle market this week than last, the number on sale, including about 50 left over last week, being 2.464. From the lesser supply a considerable advance was anticipated, but it was not fully realized. On Tuesday the cattle brokers held on strong for half s cent a pound higher prices than they obtained the week previous, asking 11; to 12 cents net a pound for all first-class beeves. Toward night they seemed willing to yield a little and sell as low as a week ago: but on Wednesday morning they got their ideas up again, and the rales of the morning were generally at an advance. Toward noon the market grew very dull, and prices again grew easier to the buyers, and the cattle went off somewhat rapidly till rearly all were sold, when holders took advantage of late buyers, and the market closed at full half a cent better rates than were obtained a week ago. Full and in teresting particulars will be found under the head o Cattle Market Reports. The extremely low rates a which cattle are transported from Illinois at the present time operate to increase the supply and keep prices within reasonable bounds,

OLD RECORDS,-The Controller, in his thorough examination of old accounts of the city, occasionally meets some quaint records. A ledger in hand vesterday, bore the date of 1699 to 1700, which pretty nearly touched bottom. Accounts in those days were kept by a very simple method. Mr. Valentine has in his collection in the City Hall, manuscript Corporation documents and proceedings, dated as far

THE TAX COMMISSIONERS SWORN IN .- The Tax Commissioners were duly sworn in yesterday, and the Board re-organized by the election of A. J. Williamson, sits presiding officer. All of the present deputie and clerks were temporarily reappointed. Richard Mott was appointed to the vacancy caused by the death of Henry V. Lovell. So far as the deputies and clerks are concerned, there will be some changes after the tax rolls of this year are completed. The Controller and Commissioners thought it advisable, however, not to make any changes at present, as the arties who have been engaged in making up the tax alls for 1859, were supposed to be the best qualified complete them. The salaries and expenses of the fice are to remain the same as for the past two years, we that the Assessors, who make assessments for exporation improvements, will hereafter receive 000 a year salary, instead of about \$4,000 in fees. he expenses of the office for 1858, were within a action of \$60,000 for salaries and fees. Under the w organization they will not exceed \$53,000, showg a decided decrease.

A LA Mode.-New-York society is probably as yet its chrysalis state; it is a queer compound of wealth, mins and blood, to say nothing of that distinct if not stinguised foreign element which mingles in it, and resit a variety, quite novel and interesting to the server. Wealth is represented by the Higginses, e Thompsons, the Johnsons, or the Smiths, whose computations in a successful mercantile career have abled their families to domesticate themselves in daces upon the Fifth avenue, to give princely enterchmen, and all the paraphernalia of fashion. These very important personages in society; they have a

respectability measured by the length of varied shapes-literary, artistic and eccentric. esentatives are a class by themselves-who hold wealth, although very convenient, is but a secmy consideration, and that the true standard of is in books, paintings, sculpture, theaters and ares. It may be safely assumed that with this Shakespeare, Milton, Michael Angelo, Raphael d the like, would be considered as entitled to the M rank in society-while Crosses and the Rothschilds

wald be esteemed as vulgar.

On the other hand, blood boils up in the ranks of le real Knickerbockers-the descendants of the first diers-who look back upon a long line of worthy secstors, with pride and affection; who swear by section Hudson, and consider Peter Stayvesant the figinator of New-York society. These con-Quent parts acting independently as a rule, still ingle occasionally and look down upon each other. Is decide which takes precedence would be a matter difficulty. Wealth makes the greatest showisod the most aristocratic prefensions, and brains am the largest show of admiration. In Boston, wever, blood would be accorded the first position rais the second; and wealth would trot along the third rank, unless at the same time umbined with blood or brains. Here, where society tso to speak, in a primitive state, we are in a de Dee of confusion, from which we may emerge as we *ttle down, refine and consolidate. We mean well tough, but searcely know how to show it. We are twand heterogeneous, fresh and crude. Our candithe for society spring up with the brown-stone teribs to a backbone. The keeper of a cornetbeery this year may be a millionaire on the Fifth tenue the next, and brains which no one ever and of yesterday may be out with a new book, a wk of art or a fresh lecture to-morrow. Upon whole we conclude that we shall finally improv th upon Boston, where blood, and some of it very Wh congulated and tainted, is held altegether to Sch in veneration. Here there is reason to hope We may at last possibly establish, as the stand-Hof fashionable society, moral excellence of charter, intelligence and good breeding. We are now amoch absorbed in growing to give these matters ber attention. We have an island extending to been to fill up, an 800 acre park to build streets but, but within a half century we shall arrange and Sact society, get our streets properly cleaned, prowins, and perhaps present a beautiful example of blass, winnowed, compacted and happy community.

IDESCRIED HUSBESD KILLS HOUSELF. For some past Johann Schmidt, a German, has resided at B Reade street, but owing to the inconstancy of the, a gay and faccinating woman, his married been an unbappy one. Mrs. Schmidt occabandoned her turband, and classical away

him so sorely that he became perfectly reckless, giving up his business and apparently having no hope in the future. Two or three days since he exhibited a bottle of laudanum to Henry Kelson, one of his neighbors, and said that he had no desire to live, as his wife had left him. Nothing more was seen of him till yester day morning, when he was found dead in his bed. Coroner Schirmer held an inquest on the body, when it appeared from the evidence that death was the result of taking laudanum. Deceased left a letter in his Bible, setting forth that he had no desire to live. as his wife had left him and was leading an abandoned life at a house in Baxter street.

DEATH OF A NEW-YORKER AT SING SING .- James B. Cochran, esq., a merchant of this city, died very suddenly at Sing Sieg on Monday evening. He ar. rived in this city the same morning by one of the trains, attended to his business, and appeared to be in his usual good health returning home by the evening train. A short to ter his arrival home he com plained of an uneasy cosation in the region of the heart, and requested his coachman to get a carriage in readiness to convey him to the residence of Dr. Fisher. The carriage was driven round to the door, when he remarked that he believed he would not go to the Doctor's, but sent word for the Doctor to call on him, at the same time remarking that he would retire to his room and lie down. In a short time the Doctor arrived, when, to the surprise of his friends, Mr. Cochran had expired.

Mr. Croshy says that he meant only to carry on the business legitimately, in the absence of his brother who was out of town, but Mr. Williams, the complainant, alleges that the checks referred to in the com-plaint were signed with fraudulent intentions.

ACCIDENTAL DEATH .- An inquest was held at the

Alleged False Preferences.—Thomas Brennan, a lawyer, was arrested on Wednesday morning on complaint of Thomas O'Compor of No. 44 Worth street. It appears that Brennan represented himself as the agent authorized to let certain premises at the corner of University place and Twelfth street, and induced O'Compor to pay him \$197.50 as three months' advancement. Subsequently the landlord ejected O'Compor, never having authorized Brennan to let the premises. Brennan was committed by Justice Connolly for examination.

MAYOR'S VETO OF THE CITY RAILROAD.—At the meeting of the Jersey City Common Council on Tuesday night, Mayor Gregory sent in a message veloning the resolution passed by the Council at their previous meeting, authorizing a company to lay rails in certain structs of the city. The Mayor regrets havirs to resect to this course, as he is convinced that such permission should be given that the people residing in as well as beyond the city limits should be provided with cheap and convenient means of conveyance. His objections were that the resolution was adopted without petitions, for or against, having been received from the residents on the proposed route; that there is no restriction to the number of tracks to be laid on some portion of the route, nor of the charge to be made to passengers, both of which should be limited in the grant; that it seems to imply the right of both companies to cross the railroad tract twice within half a block; that the right to lay a track must be granted by an ordinance and not by resolution; that doe notice should be given to the public after the course of the route is determined upon, to bear objections thereto before beedways prepared and exclusive privilerss, and that stipulations and reservations should be acreed upon as to the right of taration. The Mayor does not apprehened any efficiently in making these

TRIAL OF JAMES GLASS FOR THE MURDER OF WILLIAM

The District-Attorney moved on the case of James The District-Attorney moved on the case of James Glass, indicted for the murder of Wm. Owens, in Elm street, on the 25th of January last. It will be remembered that a rictous disturbance took place in Elm street on the night of the 25th of January, during which a man named William Decker was shot while endeavoring to exclude James Glass and others from his house. Wm. Owens, a stevedore, was passing at the time, and endeavored to keep the parties quiet, when one of them fired a shot which caused his death. Two hours were spent in efforts to obtain a Jury, and when the panel became exhausted, only nie jurors had been found competent. A new panel of 150 jurors was ordered, returnable on Thursday morning.

The early transactions of the day were at lower prices than at the close of yesterday, and during nearly the whole session of the First Board the tone was that of duliness. On the second call, however, the bidding was more spirited, and after the adjournment several leading brokers came in to the support of New-York Central and Rock Island, and the result was a quick rally in these two stocks and a sympathetic movement in other active descriptions. The lowest price touched for New-York Central in the morning was 73 for cash stock, but on sellers option sales were made at 72, and at one time the offerings were as low as 71;, s60. Michigan Southern Guaranteed was quite active, at a decline of i & cent, but was up again to 33 be-tween the Boards, and still better in the afternoon. Rock Island sold at 60 at the start, and on short sellers option, contracts were done as low as 594, but be fore the call closed the quotations run up to 601 and that price was bid afterwards. Galena was a little heavy and sold down to 647, but was afterwards a fraction better with the rest of the market. Michigan Central sold down to 491 and at 49 s.30. The April returns on both of these roads show a large decrease as compared with the corresponding month of 1858. Harlem Preferred was in demand at 381, and in the afternoon advanced to 394, which was bid at the close. Panama maintains its firmness, and was steady through the day at 122; bid. In the afternoon the stock sold at this price, sellers' option, sixty days. The dealings at the Second Board were not large, but for New-York Central and Rock Island the market was considerably excited, and at one time quite buoyant. Most of the prominent Railways were also better, but not generally active. Towards the close of the session there was a slight reaction, and after the Board prices fell off again, New-York Central selling down to 737, and Rock Island to 611, but later in the day the feeling was stronger again, and the market closed firm. The movements in these two stocks seem to be the absorbing ones of the day, and nearly all of the rest of the speculative stocks appear to rise or fall according to the course of the market on those two favorites of the speculative operators of Wall street. The trade in Bonds has been limited during the day, except for Missouris, which were steady at 874. We hear of a private sale of \$50,000 Government 5s of '74 at 1041, and that price was afterward bid for more. The demand for investment is gradually absorbing this favorite stock, and the lots in the street are diminishing rapidly. The closing prices were: United States 5s, 1041@1041; Virginia 6s, 97 | @971; Tennessee 6s, 931 @ 934; Missouri 6s, 871 2874; Canton Company, 19 3 194; Cumberland Coal Company, 18 220; New-York Central Railroad, 78 2781; Erie Railroad, 8281; Hudson River Railroad, 321@321; Harlem Railroad, 111012; Harlem Railroad Preferred, 39 2391; Reading Railroad, 50 2 2504; Michigan Central Railroad, 491 2497; Michigan Southern and Northern Indiana Railread, 10; 0102; Michigan Southern Railroad, Guaranteed, 334 2 334; Panama Railroad, 1224 2 1224; Illinois Central Kailroad, 641 264; Galera and Chi cago Railroad, 652654; Cleveland and Toledo Railroad, 251 226; Chicago and Rock Island Railroad, 611 2611; Pennsylvania Coal Company, 811 282; Pacific Mail Steamship Company, 781 2781.

In Exchange there is nothing of importance doing, and rates are unchanged.

Freights-To Liverpool: 300 bales Cotton at 3-16d; 250 bbis, Rosin at 1s. 6d.; 350 tes. Beef at 2s. 3d.; 300 bbls. Perk at 1s. 6d. To Rotterdam: 5,000 light Pipe Staves at 25s.

The business of the Sub-Treasury was: Receipts \$69,968 28-for Customs, \$59,000; Payments, \$97,044 82; Balance, \$6,423,687 44.

The official statement of the earnings of the Galena Road in April is \$90,000, against \$141,000 in April last year, a decrease of \$51,000. The third week on the Michigan Central gives \$30,960 36, against \$58,-536 20, a decrease of \$17,600. The aggregate of the three weeks is \$99,000, against \$158,000, a falling off of \$59,000. The Rock Island Road will show, it is estimated, \$12,000 to \$15,000 falling off for the month, which is favorable, compared with the decrease on other Western Roads. From unofficial sources it is stated that the decrease in April of receipts on the Eric Road was over \$200,000. The settlements with other reads will, it is supposed, reduce this amount

The traffic of the Hudson River Railroad for April quite satisfactory. The figures are as follows:

The Fort Wayne and Chicago Road has adopted

the Creamer Safety Brake on all their equipage. The steamer to-morrow will take \$400,000 or \$500,000,

a million and a quarter. The steamer from Boston to-day took \$166,000. The business of the Clearing-House was \$27,449,000, which is large. In money there is no change to note. The supply of paper in the banks and discount houses shows perhaps a small increase, but the demand freely absorbs all of the right character at 5 26 P cent, with occasional transactions at lower figures. Single-name six months' dry goods paper of leading names goes at 6 27 \$\psi\$ cent-not often under 7 \$\psi\$ cent. Money is very abundant, and prominent stock houses are borrowing as low as 3] #4 P cent. The current rates, however, are 1@5 P cent.

FREIGHTS TO THE WEST.—The Boston and Worcester and Western Railroads have generously acceded to the policy advised by the Board of Trade, and have made a reduction of about 50 V cent in the rates of freight westward over these roads. Our merchants cannot fail to appreciate this liberal conduct, which will doubtless tend to the general prosperity of the business interests of Boston.

We saw a copy of a bill of lading yesterday, issued at Louisville, on account of the Pennsylvania Central Railroad, which furnishes the following information: Atkinson & Co. shipped 565 tierces of lard, weighing 350 lb each, by the Pennsylvania Railroad route, at 90c, each per ticrce, being about 25 c. 9 100 lb. It was taken by river to Pittsburgh, and thence by rail, to be delivered on the wharf at New-York. The river fraight, we understand, was 10c. 9 100 lb. After paying this charge, drayage at Pittsburg, and reshipping charges at Philadelphia, with other scattering expenses for handling, the net receipts of the Railroad Company will be about 0. Messra. Atkinson & Co. should not complain of that transaction.

A gentleman was making inquiries on Change, yesterday, as to the fare between Cincinnati and New-York, when the President of the City Council informed him that by shipping two hogsheads of bacon by "all rail," he would be entitled to a free pass. It will take a great many conventions, and more resolutions than we would care to print, to get the railroad business into proper shape again.
